

CARGO FACTSHEET

PC-12 47/E NGX

24/7 FLIGHT CARE FOR YOUR URGENT FREIGHT

Go Now. JETLIFE-AVIATION ensures that the urgently needed freight is on its way within 90 minutes. This means that production downtimes, for example in the automotive sector, can be avoided by maintaining supply chains, and loading is carried out in close cooperation with trusted ground handling partners at the respective airport. The large cargo door of the PC-12 allows AOG parts, spare parts for the pipeline industry or automotive parts to be loaded particularly quickly and by forklift truck.
